## **Exhibit 1 to O-18-11**

### **Amendment:**

Revise the Integrated Development Ordinance and Zoning Conversion Map to incorporate all technical revisions in the attached spreadsheet of technical edits. See attached.

### **Explanation:**

Exhibit 1 is a spreadsheet of proposed changes to the IDO that are technical in nature and non-substantive. This exhibit contains an array of changes to various topics; however the spreadsheet is organized into the following sections:

- General- Entire Document
- Part 1- General Provisions
- Part 2- Zone Districts
- Part 3- Overlay Zones
- Part 4- Use Regulations
- Part 5- Development Standards
- Part 6- Administration & Enforcement
- Part 7- Definitions & Acronyms
- IDO Conversion Rules

These reflect the organization of the IDO document. These changes come from ongoing staff and public review of the adopted IDO which identified a number of technical revisions that will make the draft clearer and easier to use and administer. This exhibit also provides direction for AGIS to finalize the zoning conversion map based on zoning in place when the IDO becomes effective. This process will apply the conversion rules for base zones in the Zoning Code via 2-2-1 in the IDO; properties with SU-1 and R-D zoning, and properties in Sector Development Plans with SU-2 and SU-3 zoning. This process includes the conversion of R-1 zoned properties to the appropriate subzone (R-1A, R-1B, R-1C, and R-1D). Zone changes and subdivisions that are final as of the effective date of the IDO will therefore be converted appropriately in the final zoning conversion map.

<u>[Number, maximum]</u>	<u>One rooftop sign per building]</u>	
<u>[Height, maximum]</u>	<u>The height of the rooftop sign, measured from the top of the highest parapet to the top of the sign, shall not exceed 25% of the height of the building or 15 feet, whichever is the more restrictive]</u>	
<u>[Size, maximum]</u>	<u>75 square feet]</u>	

- Page 276, Section 5-12(F)(3), add a new mapped area:
  - [EDo: (Insert map that shows areas mapped as EDo CPO and EDo HPO). Within the EDo mapped area rooftop signs shall be an allowed type of building-mounted sign.]
- Page 452, Section 7-1 Definitions, revise the roof sign definition as follows:

Sign, Roof

A building-mounted sign or sign segment that is higher than the roof of the building or canopy to which it is attached. [This includes rooftop signs.]

**Explanation:**

This amendment seeks to revise the sign regulations in order to allow rooftop signs within a specific mapped area, within the EDo CPO and HPO. This amendment is limited in scope to allowing one additional type of signage (rooftop signs) in a limited geographic area (EDo CPO and HPO). This amendment is in response to interest from the EDo Neighborhood Association and business community. This request was initiated during the summer of 2017, and was originally a request for an amendment to the Zone Code, however given the timing of the IDO adoption, the request was delayed and it was more logical to address this as an amendment to the IDO.

The rooftop signs are limited to designs that are primarily metal framed with neon tubing, with a limited amount of the signage on a solid background. This amendment seeks to reflect historic forms of rooftop signage, characteristic of commercial corridors through the 1960s. The provisions of the amendment ensure that new signs reflect the historic forms of rooftop signs. This amendment builds upon the Central Avenue Neon Design Overlay Zone which seeks to support and encourage neon along the Central Avenue corridor. Historically Central Avenue contained a number of rooftop signs, however few examples remain. Two existing examples include the Nob Hill Business Center (3500 Central Avenue SE) and the Morningside Shopping Center (4001 Central Avenue NE). Design characteristics of a rooftop sign include metal external supports and bracing, neon or neon like lettering, and a roof top location. This amendment will allow rooftop signs only within the EDo CPO and EDo HPO. Any signs located within the EDo HPO will still need approval through Landmarks Commission. At this time the language applies only to the EDo area, however if there is interest in this applying in other areas of Albuquerque additional mapped areas could be added.

**Explanation:**

Application fees for different application types are set by several ordinances that have been incorporated into the IDO. This exhibit carries forward fees established by these various ordinances, as

well as incorporates the authority for the Planning Director to set additional fees as needed. This exhibit does not raise fees related to planning and zoning requests, but rather carries them over as they exist in the City's Code of Ordinances today. The "as needed" fees cover administrative costs related to items such as document preparation, printing and advertising costs, facilitated meetings, and others as noted in 6-4(G)(2), above. The Planning Department has the authority today to set such fees administratively.

Where no fee is currently established by ordinance, but the application type in the IDO is similar to other application types that are established by ordinance, a new fee was proposed to match the most analogous application type. A column indicating the existing ordinance source has been added for purposes of consideration of these fees. This column will not be included in the IDO document.

### Amendment:

*Note: Italicized text reflects commentary on the proposed update.*

- Page 174, Table 5-1-4 (Allowed Encroachments and Exceptions)
  - Add a line in the section for “Encroachments into Required Setback Areas” as follows:  
[Freestanding signs / May encroach any amount, but not closer than 3 ft. from any lot line.]
- Page 270, Section 5-12(A), revise as follows:
  - The purpose of the regulations in this Section 14-16-5-12 is to promote and protect the public health, welfare, and safety by regulating existing and proposed outdoor signs of all types. More specifically, these regulations are intended to help implement adopted ABC Comp Plan policies, protect property values, create a more attractive economic and business climate, enhance and protect the physical appearance of the community, preserve scenic and natural beauty, [minimize sign clutter], reduce hazards that may be caused by signs overhanging or projecting over public rights-of-way, curb the deterioration of the community's appearance and attractiveness, [comply with all applicable federal and state laws regarding the First Amendment and free speech, and avoid regulating signage based on content, viewpoint, or message].

*Note: There are no conclusive studies on the specific contribution of signs to traffic accidents, so that phrase was deleted. Language is added to clarify that IDO regulations will be administered and permits issued without regard to the content or message of the sign.*

- Page 271, Section 5-12(D)(1)(a), revise as follows:
  - 1. Signs with an area greater than [24] square feet.  
*Note: this will ensure that more signs in mixed-use and non-residential development will be adequately reviewed for compliance with the IDO, including newer-style signs (such as window wraps) and signs that are not part of site plans or master development plans.*
  - 7. Electronic signs, [including changes to an existing sign that turn it into an electronic sign and expansion of the electronic area of an electronic sign.]

*Note: For consistency with the streamlining of electronic sign definitions (see item in this Amendment for p. 450).*

- Page 272, Section 5-12(E)(1) (Content), revise as follows:  
[5-12(E)(1)(a) The regulations of this Section 14-16-5-12 shall be administered and implemented without regard to sign content or message except as required to determine the applicability of and compliance with Section 5-12(G) (Off-Premises Signs).

5-12(E)(1)(b) Any sign content or message may be substituted for different sign content on any sign allowed under this Section 14-15-5-12, or on any sign that is a legal nonconforming sign under this IDO.]

*Note: Language is also added in this subsection to clarify that IDO regulations will be administered and permits issued without regard to the content of the sign.*

- Page 273, Section 5-12(E)(5)(a)(3) [new]
  - [No portion of an illuminated sign shall have a luminance greater than 200 foot lamberts or 685 Nits at night.]

*Note: This change consolidates the regulations for sign luminance in Residential zone districts and Mixed-use and Non-residential zone districts into a single general regulation at a lower maximum luminance level. The term “or 685 Nits” was added to provide the metric equivalent of 200 foot lamberts.*

- Page 273, Section 5-12(E)(5)(b)2b

*Note: See item for p. 273, 5-12(E)(5)(a)(3) [new]*

- Page 274, Table 5-12-1 (On-premises signs in Residential Zone Districts)
  - Under Monument Sign, add a row as follows:  
[Height, maximum / 4 ft.]  
*Note: A maximum height adds clarity.*
  - Under Allowed and Non-conforming Non-residential Uses, in Height, maximum row, revise to:  
[Freestanding sign: 6 ft.]  
*Note: This allows a slightly higher sign for a non-residential use.*

- Page 275, Table 5-12-2 (On-premises Signs in Mixed-use and Non-residential Zone Districts)
  - Under Wall Sign, Number, maximum, delete “1/establishment frontage” and revise as follows: [N/A].  
*Note: This will allow the maximum % facade area to regulate and provide some design flexibility.*
  - Under Projecting Sign, Number, maximum, revise text as follows:  
[A projecting sign is allowed in lieu of – not in addition to – an allowable freestanding sign.]

- Under Projecting Sign, Size, maximum, revise text as follows:

[Same as maximum size of the freestanding sign it replaces.]

*Note: Rather than allowing a projecting or wall sign, these two changes reinstate the approach used in the Zoning Code. Projecting and freestanding signs serve a similar function in that they are typically perpendicular to the street.*

- Page 276, Table 5-12-2 (On-premises Signs in Mixed-use and Non-residential Zone Districts)
  - Under Freestanding Sign, delete Type row.

*Note:*

- Monument signs are already defined on p. 451 of IDO.
- The prohibition on freestanding signs in MX-FB was an error.
- Pole signs are considered acceptable in most areas of the city. The prohibition on freestanding signs in Nob Hill/Highland - CPO-8, except for pole signs that meet the provisions of 5-12(F)(4)(a) (Neon Signs along Central Avenue), is included in the proposed Technical Edits to the IDO (see the line for p. 87, 3-3(l)(5)).

- Page 276, Table 5-12-2 (On-premises Signs in Mixed-use and Non-residential Zone Districts)
  - Under Freestanding Sign, revise as follows:

Table 5-12-2: On-premises Signs in Mixed-use and Non-residential Zone Districts		
Sign Type	Zone District	
	Mixed-use Zone Districts, NRC, NR-LM, NR-GM	NR-BP, NR-SU, NR-PO, PD, PC
	Standard	
Freestanding Signs		
Number, maximum	<u>[1 / premises / street frontage. A freestanding sign is allowed only where the street frontage is at least 100 linear ft.]</u> or 1 / Joint Sign Premises, pursuant to Subsection 14-16-Error! <b>Reference source not found.</b>	Per approved plan[1]
Size, maximum	<u>[MX-T, MX-FB-ID: 50 sq. ft.]</u> MX-L: 100 sq. ft. <u>[MX-M, MX-H, MX-FB-FX, MX-FB-AC, MX-FB-UD, NR-LM, NR-GM: 100 sq. ft. at allowable locations abutting a local or collector street 200 sq. ft. at allowable locations abutting an arterial street or interstate highway 300 sq. ft. at allowable locations within 200 feet of a moving lane of an interstate highway and is visible from the interstate highway.]</u>	
<u>[Height, maximum]</u>	<u>[MX-T, MX-FB-ID: 9 ft. / MX-L: 15 ft. / other MX zone districts, NR-C, NR-LM, NR-GM: 26 ft. For a free standing sign that is located within 200 feet of a moving through lane of an Interstate Highway (excludes highway ramps), the allowable sign height may be measured from the freeway road grade measured at the closest point from the premises.]</u>	
[1] Per approved NR-BP Master Development Plan; NR-SU, PD, or PC Error! Reference source not found.; or NR-PO Master Plan as applicable.		

Note regarding, "Size, maximum": These numbers have been adjusted from the Zoning Code to be slightly lower in the lowest intensity zones and for other zones where signs are located near arterial or interstate highway.

Note regarding, "Height, maximum": A maximum height adds clarity. The 26 ft. maximum height in the higher-intensity zones is carried over from the Zoning Code, while the numbers in the lower-intensity zone districts are calibrated to their transitional character and neighborhood scale. The maximum height allowed near freeways is relative to these base numbers.

- Page 287, Table 5-12-4 (Off-premises Signs in Mixed-use and Non-residential Zone Districts)
  - Under "Setback, minimum" delete the entire row "From conforming residential use."
  - Under "Separation, minimum", add: From residential use / 150 ft. (for all zone districts).

Note: This is a separation not a setback requirement and deleting "conforming" will ensure protection for all residential uses.

- Page 290, Table 5-12-7 (Construction Period Sign Standards)
  - Revise Table 5-12-7 as follows:

- Page 451, Section 7-1 (Definitions)
  - Sign, Monument. Revise definition as follows:

[A sign with a maximum of 2 sign faces that are integrated into a solid structure beginning at the ground and including a base and/or up to 2 masonry or concealed supports. The total width of the support(s) at the bottom of the sign shall be no less than 25% of the width at the top of the sign. See also *Sign, Freestanding*.]

*Note: To allow more flexibility in terms of design and materials, but still require a design that integrates the sign message and/or image with its structure.*

- Sign, Window. Revise definition as follows:

[A sign on a window or door, with its message or image discernible from the exterior of the building. Window wraps and glazing with messages or images are considered window signs.]

*Note: For clarity and to address newer-style signs.*

**Explanation:**

This exhibit seeks to revise language throughout the IDO as it relates to sign regulations. Primarily, this exhibit affects the sign regulations in Chapter 5-12 and definitions in Part 7-1 related to signs. The intent of this exhibit is to bring the sign regulation standards closer to how signs are regulated in the Zoning Code today, to update terms used by the sign industry, and to provide greater clarity and consistency throughout the document. Explanations are given for specific items in the amendment as notes in *italics*.

## Exhibit 5 to O-18-11

**Amendment:**

- Page 219, Section 5-5(F)(2)(a) Low Density Residential Development, revise Section 5-5(F)(2)(a)1. to read as follows:

[The area of the front yard that can be improved for] driveways and ~~off-street~~ parking areas [in all residential zones except the RA zone] shall be [limited pursuant to Table X-X-X] ~~cover~~ no more than 60 percent of the area of the front yard

[Table X-X-X-X]

<u>Lot Size</u>	<u>Maximum Front Yard Parking Area</u>
<u>&gt;5,000 square feet</u>	<u>400 square feet or up to 60%, whichever is greater</u>
<u>&lt; 5,000 square feet and &gt; 2,200 square feet</u>	<u>400 square feet or up to 75%, whichever is greater</u>
<u>&lt;2,200 square feet</u>	<u>400 square feet or up to 85%, whichever is greater]</u>

- Page 379, Section 6-6(O)(3), add an additional section for criteria for variances to the Front Yard Parking Areas:

[6-6(O)(3)(c) Variance for Front Yard Parking Areas

1. A Variance for a Front Yard Parking Area may be granted provided that the following criteria are met:
  - a. The request meets the requirements of this Subsection 14-16-6-6(O).
  - b. There is one or fewer on-street parking space per dwelling unit available within 330 linear feet of the subject property.]

- Page 401, Section 6-8(G) Nonconforming Site Features, create a new Section 6-8(G)(3):

[Section 6-8(G)(3)(a) Parking on areas other than allowed pursuant to Subsection 14-16-5-5(F)(1)(a)3 is illegal, and such parking must be discontinued within the timeframe specified by Code Enforcement in notice provided to the property owner, with the following exceptions:

Section 6-8(G)(3)(a)1. Front Yard Parking Areas in Existence Prior to June 17, 2007.

a. Front Yard Parking Areas not satisfying the requirements of this IDO that were improved for and specifically dedicated to use as a front yard parking area prior to June 17, 2007, and that otherwise satisfied the requirements of all applicable regulations in place at the time of their installation, may continue to be used for as a front yard parking area pursuant to the provisions of this IDO governing nonconforming uses and structures. For purpose of this subsection, “improvements” include only impervious surfaces such as concrete or asphalt or all-weather

pervious services surfaces such as recycled asphalt or driveway gravel (as distinguishable from landscape gravel). In order to enjoy non-conforming status under this Section 14-16-6-8, any such improvements must have been installed for and suitable for the specific purpose of front yard parking and maneuvering.

- i. Where a residential unit has an existing, improved front-yard parking area, parking on unimproved surfaces such as dirt, grass or landscape areas, or upon surfaces that were improved for any purpose other than front yard parking such as decorative gravel areas, patios or pedestrian walkways, must be discontinued regardless of the year of development of the property or improvement.

b. Where an existing residential unit lacks an improved front-yard parking area, and improved front yard parking areas were not required at the time of the unit's initial development, such residential unit may continue to utilize a portion of the front yard for parking subject to the size and area limitations prescribed by Subsection 14-16-5-5-(F)(2)(a)1

Section 6-8(G)(3)(a)2. Lawful Improvements Installed between June 17, 2007 and the effective date of the IDO. Front Yard Parking Areas not satisfying the requirements of the IDO but that satisfied the requirements of all applicable regulations in place between June 17, 2007 and the effective date of this IDO may continue to be used for front yard parking area pursuant to Section 14-16-6-8.]

- Page 459, Section 7-1, Definitions, add a definition for Vehicle:

**Vehicle**

A vehicle, as defined by the City of Albuquerque Traffic Code, Definitions, §8-1-1-2.]

**Explanation:**

In 2007 the City Council established a task force to consider concerns raised by the community about front yard parking. The concerns that were raised focused on where and how much parking in a front yard is appropriate. Based on the recommendations of the task force an amendment to the Zone Code was adopted; this 2007 amendment (F/S(2) O-07-61) addressed the appropriate surfaces for parking and how much of the front yard is appropriate for parking. Since the amendment was adopted in 2007, concerns about the enforceability of the language have been raised by Code Enforcement. This amendment to the IDO seeks to clarify the language from the 2007 amendment, as carried over into the IDO, and to ensure that the language is enforceable and that the intent of the original amendment is furthered.

This amendment removes the limits to the area of front yard parking in the RA zone as the equivalent zones (RA-1 and RA-2) in the Zone Code are not regulated in terms of area. This amendment also reflects the amount of the front yard that can be used for front yard parking by lot size, per the Zone Code today, with the addition of a maximum square footage in order to make the language easier for Code Enforcement to assess. The language now allows for a square footage or percentage, whichever is greater. This amendment does not go beyond the allowances today but provides clarity for Code

Enforcement and flexibility for unusual shaped or sized lots through the percentage. This amendment includes an additional variance criterion for those seeking a variance to the driveway and front yard parking allowance, reflecting conditions that could require additional parking on a lot. And finally, language is added to the non-conformities section that clarifies the status of improvements made prior to 2007.
