BE IT ORDAINED BY THE COUNCIL, THE GOVERNING BODY OF THE CITY OF ALBUQUERQUE:

SECTION 1. INTENT: This amendment revises the Comprehensive City Zoning Code to add location, buffering and site design regulations for the sale of gasoline, oil and liquefied petroleum gas in the C-1 Neighborhood Commercial Zone.

The purpose of this amendment is to reduce the impacts of increased traffic created by the construction of new service stations on neighboring residential properties, pedestrian activity and abutting streets.

Service stations already in existence in C-1 zones, or for which building permits have been received prior to adoption of this ordinance, are not affected.

SECTION 2. Section 14-16-2-16 (A) (8) is amended to read:

“(8) Retail sales of the following goods, plus incidental retailing of related goods and incidental service or repair:

- (a) Arts and crafts objects, supplies, plus their incidental creation provided there is little or no reproduction of substantially identical objects.
- (b) Auto parts and supply.
- (c) Books, magazines, newspapers, stationery, provided that no such material is advertised to be forbidden to be sold to minors.
- (d) Christmas trees, including outside sales, provided the use is limited to 45 days in one calendar year.
- (e) Clothing, shoes, dry goods.
- (f) Cosmetics, notions, hobby supplies.
- (g) Drugs, medical supplies.

(h) Flowers and plants, including minor and incidental outdoor sales.

(i) Food and drink for consumption on premises, provided:

1. There shall be no drive-in restaurant, and

2. Alcoholic drink may be sold only under a restaurant license for sale of beer and wine, as provided by Section 60-6A-4 NMSA 1978. The sale of beer and wine under a restaurant license, however, is prohibited within 500 feet of a community residential program or hospital for treatment of substance abusers pursuant to § 14-16-3-12(A)(11) ROA 1994.

(j) Furniture, household furnishings, and appliances.

(k) Gasoline, oil, liquefied petroleum gas, including outside sales, provided:

1. Location: the site shall be located on a collector or higher-ranking street.

2. Site Design

a. Number of Fueling Positions: The permissive number of above-ground fuel dispenser units shall be limited to four, with up to eight vehicle fueling positions (one per side), provided the on-site vehicle stacking requirements of § 14-16-2-16 (A)(8)(k)(2)(d) are met.

b. Vehicle Access Points: Vehicle access points shall accommodate all vehicle types expected to enter the site. Each street that provides access to the site shall have either a) two travel lanes in each direction, or b) a center turn lane with access to the site. To maintain pedestrian and traffic circulation, no more than one vehicle access point shall be located along any one street for sites at the intersection of any two streets. Sites located mid-block and accessed by a single street shall have no more than two access points. Access points shall be located as far from public street intersections as possible, but no closer than 20 feet from adjacent properties unless shared with an adjacent property owner.

in length and shall be distinct from on-site vehicle drive aisles and parking spaces. Multiple required vehicle stacking spaces may be located behind the first fueling position in a row of fueling positions

e. Fuel Delivery: Sites shall be designed so that wholesale fuel delivery occurs away from on-site vehicle drive aisles and site access points.

f. Adjacency: Where a site is contiguous to a residential zone, the additional buffer landscape and opaque wall regulations in § 14-16-3-10(E)(4) of the Zoning Code shall apply. Where a site is separated from a residential zone by an alley which is to be used to service a vehicle access point as described in § 14-16-2-16 (A)(8)(k)(2)(b), additional buffer landscaping regulations outlined in § 14-16-3-10(E)(4), subsections (a), (b) and (d) shall apply on the site side of the alley. Additionally, bollards or a wall a minimum of 3 feet in height shall be erected along the side of the landscape buffer which abuts the alley to protect the landscaping from vehicles turning into the site from the alley.
